Biographical Sketch Mark Allen

Mr. Allen has been involved in medical gas industry since 1978. He started out of college with one of the earliest medical gas certification firms back when “certification” of medical gas systems was just gaining credence. He transitioned to a major manufacturer in 1985 and has held various technical and marketing roles. He now proudly works for BeaconMedaes, the leading manufacturer in the medical gas products industry.

He has been involved in virtually all aspects of medical gas work, including regulatory, testing and certification, marketing, and product development over the last 37 years.

He is an active member of the National Fire Protection Association Technical Committee on Medical Gas and Vacuum Systems, is an active member of the Canadian Standards Association Technical Committee on Medical Gas and Vacuum Systems and is member of the US Technical Advisory Group to ISO.

He has been an officer of various committees with industry regulatory bodies and is the author of numerous journal articles, design guides and other technical aids for the engineering of medical gases. He is a frequent speaker for ASPE, ASHE and other regulatory agencies and instructor on the various aspects of medical gas.
